

# ROCKLAND GRIP GUARD™

PRIORITIZE  
SAFETY

Grip Guard™ topcoat protects your floor and puts your workforce on sure footing.

## One Product: Three Ways to Protect

*Grip Guard™ top coat is designed to deliver lasting protection by using a two coat process that reduces the effects of abrasion, while providing weather resistance, and enhanced traction. Specify Rockland's Grip Guard.™*

### BENEFITS OF GRIP GUARD™

**Weather Resistant** — Weather is an enemy of laminated hardwood floors. Extended sun and water exposure can damage the glue line and lead to deterioration of the wood. Grip Guard™ offers the industry's first UV protective top coat and absorbs 55% less water than the leading competitive wax-based hardwood floor treatment.

**Wear Resistant** — Specifying Grip Guard™ will increase the life of your floor. Our innovative two coat epoxy/urethane formulation forms a 4 mil protective coating which far exceeds the leading wax-based top coat.

**Slip Resistant** — Many top coats become slippery when exposed to water. Grip Guard™ will enhance the trailer floor's traction for wet and dry conditions. Grip Guard™ surpasses the OSHA slip resistance factor by 20% while the competition falls short of the mark set by the government agency.

**Cost of Ownership** — Floors get damaged during the course of everyday use. Specify Grip Guard™ to preserve the top of the floor, saving you time and money.

### Water Absorption

Grip Guard absorbs 55% less water than other competitive wax-based floor topcoats.

### Wear Resistance

THE LEADING TOPCOAT LASTS LESS THAN  
45 ABRASION CYCLES

GRIP GUARD OUTLASTS THE LEADING COMPETITOR BY  
505 ABRASION CYCLES

50 100 150 200 250 300 350 400 450 500 550 600

Number of Abrasion Cycles to Breakthrough

### Slip Resistance
